HARSH PATEL

AI Developer | Python | Generative AI, LLM Agents & RAG
Vadodara, Gujarat, India | +91 87350 00745 | patelharsh02102@gmail.com
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

AI Developer building production-ready Generative AI applications, including a finance agent with LLM tool calling and a document Q&A chatbot using Retrieval-Augmented Generation (RAG). Experienced in connecting LLMs to backend services, relational databases and vector search using Python, FastAPI, Claude, PostgreSQL, MongoDB Atlas Vector Search and n8n. Seeking an AI/ML Engineer or Python Developer role on a team building reliable, real-world AI products.

TECHNICAL SKILLS

Programming Languages: Python, SQL, Dart, Java
LLMs & Generative AI: Claude API, OpenAI API, Gemini API, Tool Calling, Retrieval-Augmented Generation (RAG), Embeddings, Prompt Engineering, Structured Outputs
Agents & Orchestration: LangChain, LangGraph, Model Context Protocol (MCP), n8n
Backend & APIs: FastAPI, Flask, REST APIs
Databases & Vector Search: PostgreSQL, MongoDB Atlas Vector Search, MySQL, SQLite, Firebase
Machine Learning & Data: scikit-learn, pandas
Tools & DevOps: Git, Docker, Android Studio, Firebase Console
Mobile Development: Flutter, Android (Java)

PROFESSIONAL EXPERIENCE

AI Developer | Kode Creators Private Limited **Sep 2025 – Present**

Finance AI Agent | **Tech Stack:** Python, FastAPI, Claude, PostgreSQL

- Developed an AI-powered finance agent that understands and processes finance-related user queries.
- Implemented LLM tool calling so the agent performs calculations, data retrieval and database queries through dedicated tools instead of relying on model-generated guesses.
- Designed agent workflows covering intent understanding, tool selection, SQL-based data retrieval and response generation.
- Built backend REST APIs with FastAPI and integrated PostgreSQL for structured financial data retrieval.

RAG Document Q&A Chatbot | **Tech Stack:** MongoDB Atlas, Vector Search, LLM APIs, n8n

- Developed a Retrieval-Augmented Generation (RAG) chatbot that answers questions from client-provided documents.
- Implemented document embedding and storage in MongoDB Atlas Vector Search for semantic retrieval of relevant passages.
- Integrated LLM APIs to generate context-aware answers grounded in the retrieved document content.
- Orchestrated the document ingestion, retrieval and response generation workflow using n8n.

Flutter Developer Trainee | Meetmighty IT Solutions **Feb 2025 – Jul 2025**

- Completed six months of hands-on Flutter training, building multiple mobile applications with user authentication, REST API integration, Firebase services and MobX state management.
- Implemented local storage using Shared Preferences and SQLite, and built responsive interfaces following Material Design.
- Worked on an e-commerce mini-project and a live taxi booking application project.
- Used Git, Android Studio and Firebase Console throughout development.

PROJECTS

Decoze – Home Decor Shopping App | GitHub **Feb 2025 – Apr 2025**

- Built an interactive home decor app where users browse decor categories, view product details and manage purchases.
- **Technologies:** Dart, Flutter, Firebase, Shared Preferences, SQLite

Social Media Application | GitHub **Apr 2024 – May 2024**

- Developed an Android social media app that lets users post images and chat with friends.
- **Technologies:** Android, Java, Firebase Database

EDUCATION

Master of Computer Applications (MCA) | Marwadi University (NAAC A+) **2023 – 2025**
CGPA: 6.14

Bachelor of Computer Applications (BCA) | Saurashtra University (NAAC A+) **2020 – 2023**
CGPA: 7.53

ADDITIONAL INFORMATION

Languages: English, Hindi, Gujarati
Soft Skills: Teamwork, Problem Solving, Quick Learning, Creative Thinking, Time Management
Interests: Exploring new technologies (AI tools and LLMs), Travelling, Listening to music
