CAREER OBJECTIVE

AI Developer building production-ready Generative AI applications: finance agents with tool calling and document Q&A systems using RAG. Experienced in connecting LLMs to backend services, databases and vector search with Python, FastAPI, Claude, PostgreSQL, MongoDB Atlas Vector Search and n8n. Looking to build reliable AI products as part of a Generative AI engineering team.

EDUCATION

Master of Computer Applications

CGPA 6.14

Marwadi University (NAAC A+) 2023 - 2025

Bachelor of Computer Applications

CGPA : 7.53

Saurashtra University (NAAC A+) 2020 - 2023

TECHNICAL SKILLS

- **LLMs and AI:** Claude, OpenAI and Gemini APIs, tool calling, RAG, embeddings, prompt engineering, structured outputs
- **Orchestration:** n8n, LangChain, LangGraph, MCP
- **Backend:** Python, FastAPI, REST APIs, Docker, Git
- **Databases and vector search:** PostgreSQL, MongoDB Atlas Vector Search, MySQL, SQLite, Firebase
- **Machine learning:** scikit-learn, pandas, Flask

EXPERIENCE

- **Kode Creators Private Limited – AI Developer** (Sep 2025 – Present)
 - Developed an AI-powered finance agent using **Python, FastAPI, Claude, and PostgreSQL** to understand and process finance-related queries.
 - Implemented **LLM tool calling** so the agent performs calculations, data retrieval, and database queries through dedicated tools instead of relying on model-generated guesses.
 - Integrated **PostgreSQL** for structured financial data retrieval and built backend APIs with **FastAPI**.
 - Designed agent workflows for **intent understanding, tool selection, SQL-based data retrieval, and response generation**.
 - Developed a **Retrieval-Augmented Generation (RAG)** chatbot for answering questions from client-provided documents.
 - Implemented document embedding and storage using **MongoDB Atlas Vector Search** for semantic retrieval of relevant document passages.
 - Integrated **LLM APIs** to generate context-aware answers based on retrieved document content.
 - Orchestrated the **document ingestion, retrieval, and response workflow using n8n**.
- **Meetmighty IT Solutions – Flutter Developer Trainee** (Feb 2025 – Jul 2025)
 - Completed 6-month hands-on training in Flutter development.
 - Built multiple Flutter-based mobile applications with features such as user authentication, REST API integration, Firebase services, local storage (Shared Preferences/SQLite), and state management using MobX..
 - Gained experience in UI/UX design with Material Design and responsive layouts.
 - Worked on mini-projects including e-commerce application and live project for taxi booking app.
 - Used tools like Git, Android Studio, and Firebase Console throughout the training.

PROJECT WORK

- **Decoze ([GitHub](#))** (Feb 2025 – April 2025)
 - The Home Decor project aims to provide an interactive and user-friendly platform where users can explore and purchase home decor items. The system will offer features such as browsing different decor categories, viewing product details, and managing purchases efficiently.
 - **Technology Used :** Dart, Flutter, Firebase, Shared Preferences, SQLite
- **Social Media Application([GitHub](#))** (Apr 2024 - Ongoing)
 - Social Media App that allows users to post images and chat with friends.
 - **Technology Used :** Android, Java, Firebase Database

SOFT SKILLS

- Teamwork
- Creative Thinking

HARSH PATEL

- Quick Learning
- Time Management
- Problem Solving

ADDITIONAL INFORMATION

- **Languages :** English | Hindi | Gujarati
- **Interests :** Exploring new technologies (AI tools and LLMs), Travelling, Listening to music
